 **INSCOP** RESEARCH

verifield

The public perception of the COVID – 19 epidemic in Romania

March 2020

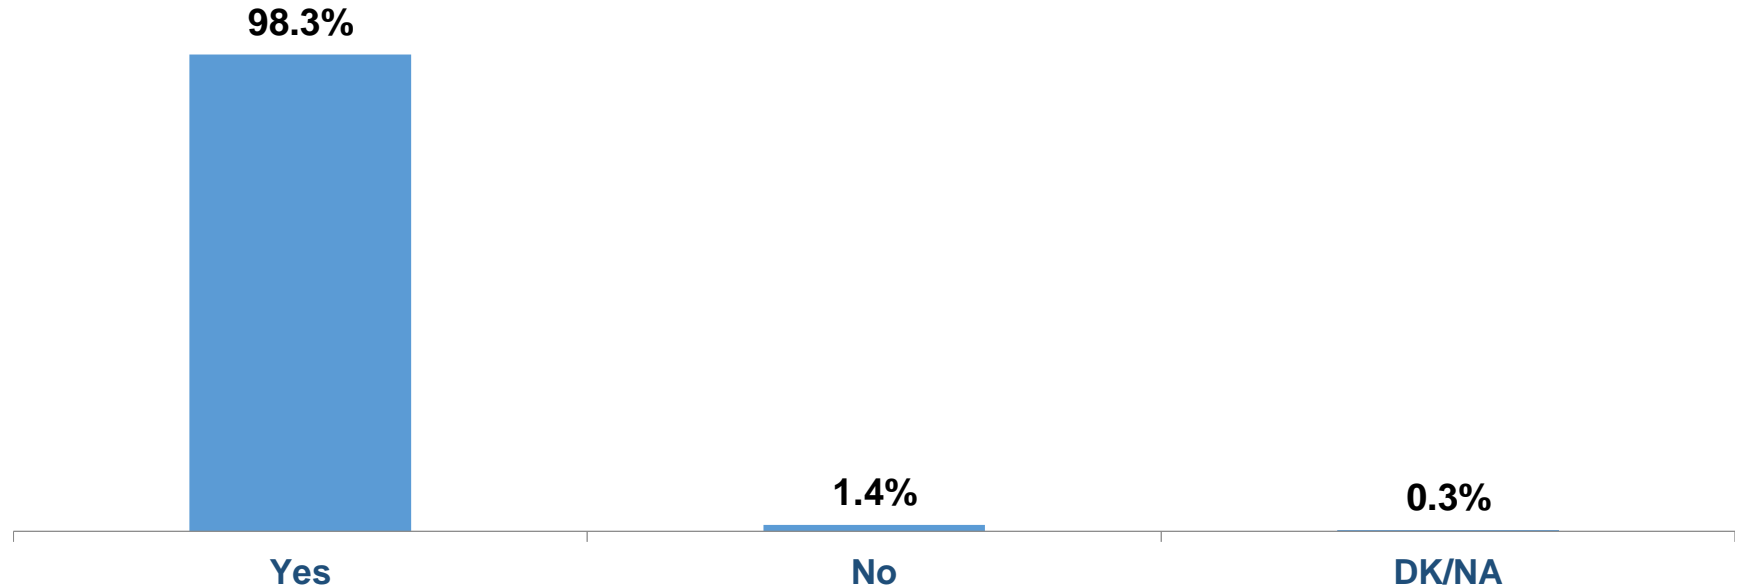

Methodology

- The survey was conducted by INSCOP Research in partnership with Verifield and Adevărul.
- The data was collected between 16 - 19 of March 2020
- The research method: in-depth interview through questionnaire
- The data was collected using CATI (computer-assisted telephone interviewing). The volume of the multi-layered and multistage sample was 800 persons, representative for the non-institutionalized population of Romania, aged 18 and over, taking into account significant socio-demographic categories such as sex, age, occupation.
- The maximum permissible error of the data is $\pm 3.5\%$, at a confidence level of 95%.
