

National opinion poll – January 2024

Part III: Voting intention for presidential elections. Two lists of candidates. Chapter 1

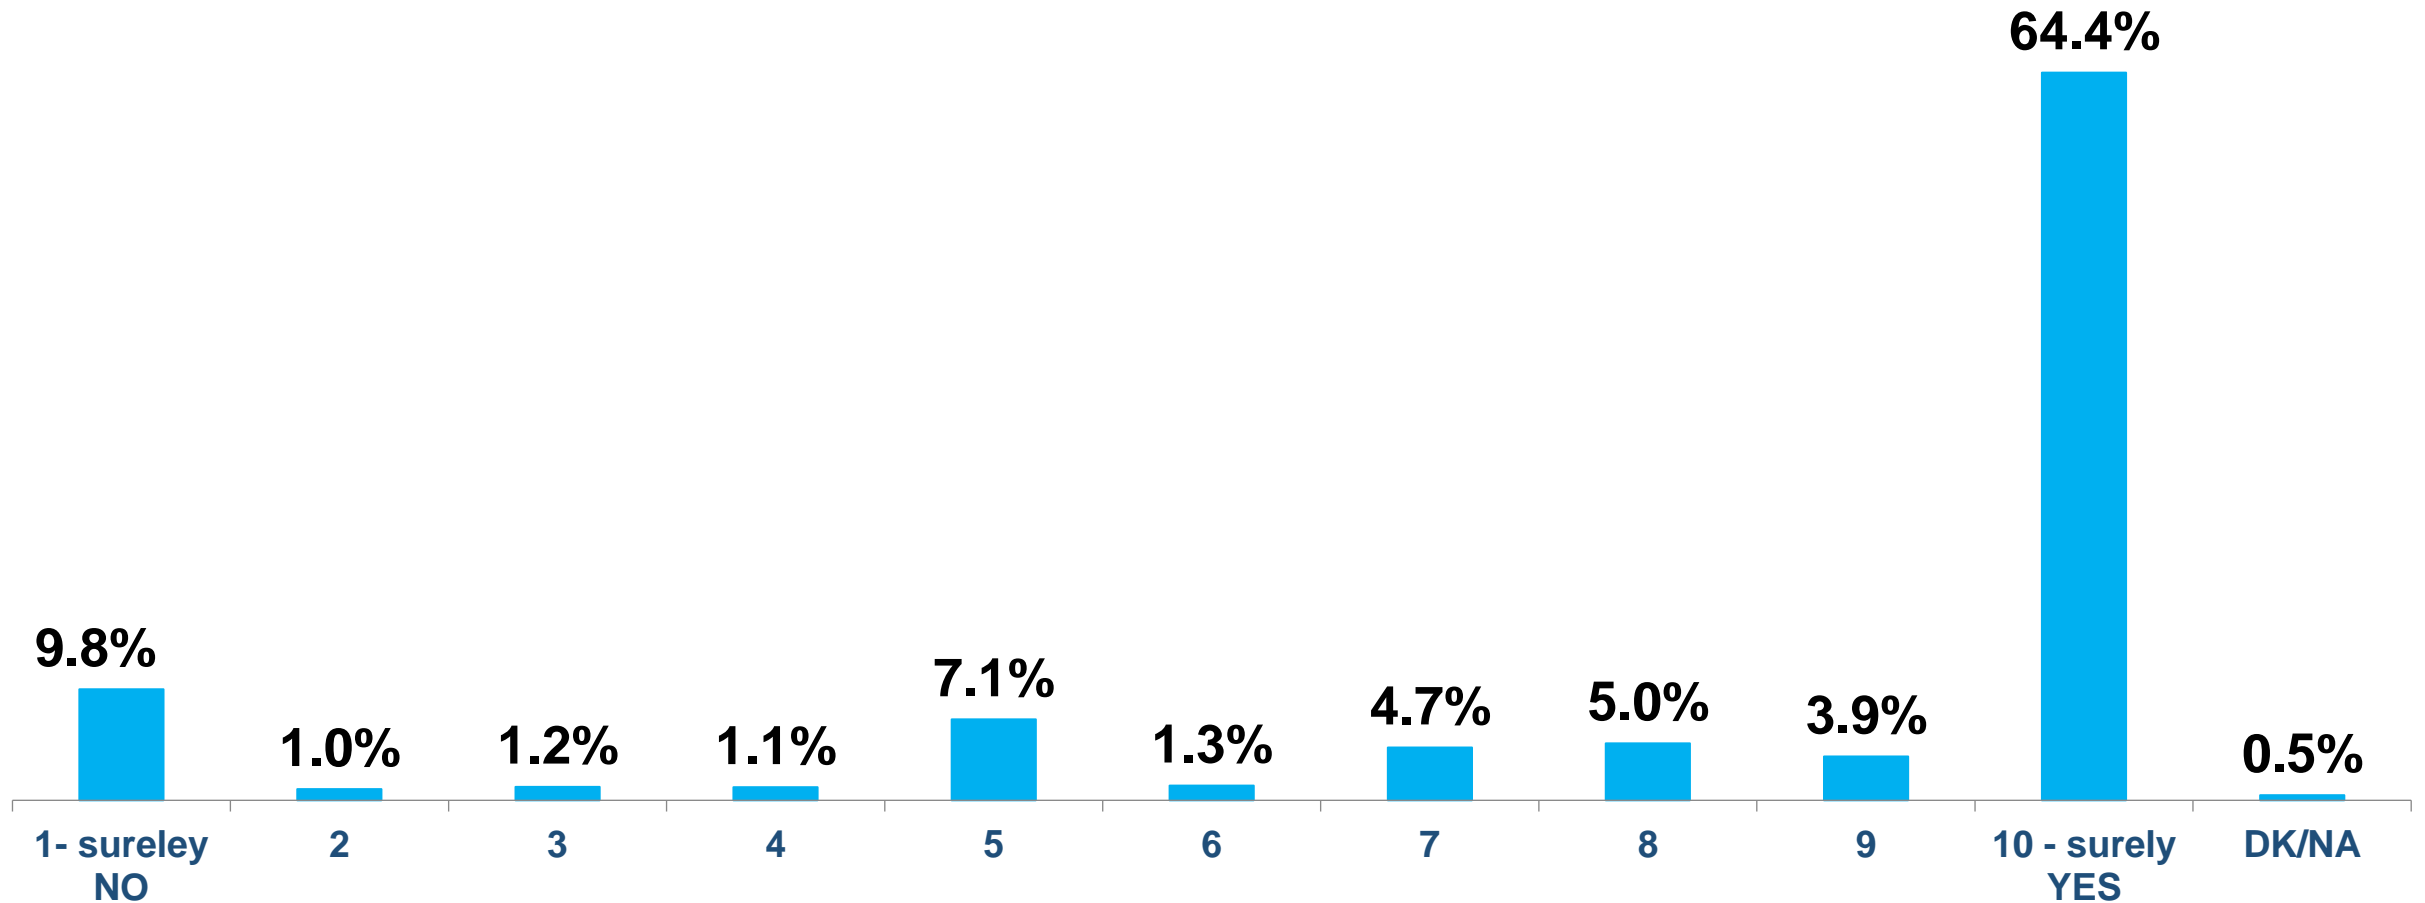

Methodology

- **The INSCOP Research opinion poll was commissioned by the press agency News.ro**
- The data was collected between 16 -24 January 2024
- Research method: sociological survey through questionnaire, CATI (telephone interviews)
- The sample, which comprised 1,100 people, is representative according to significant socio-demographic categories (sex, age, occupation) for the adult population of Romania (aged 18 and over 18).
- The maximum error of the data is $\pm 3\%$, at a confidence level of 95%.

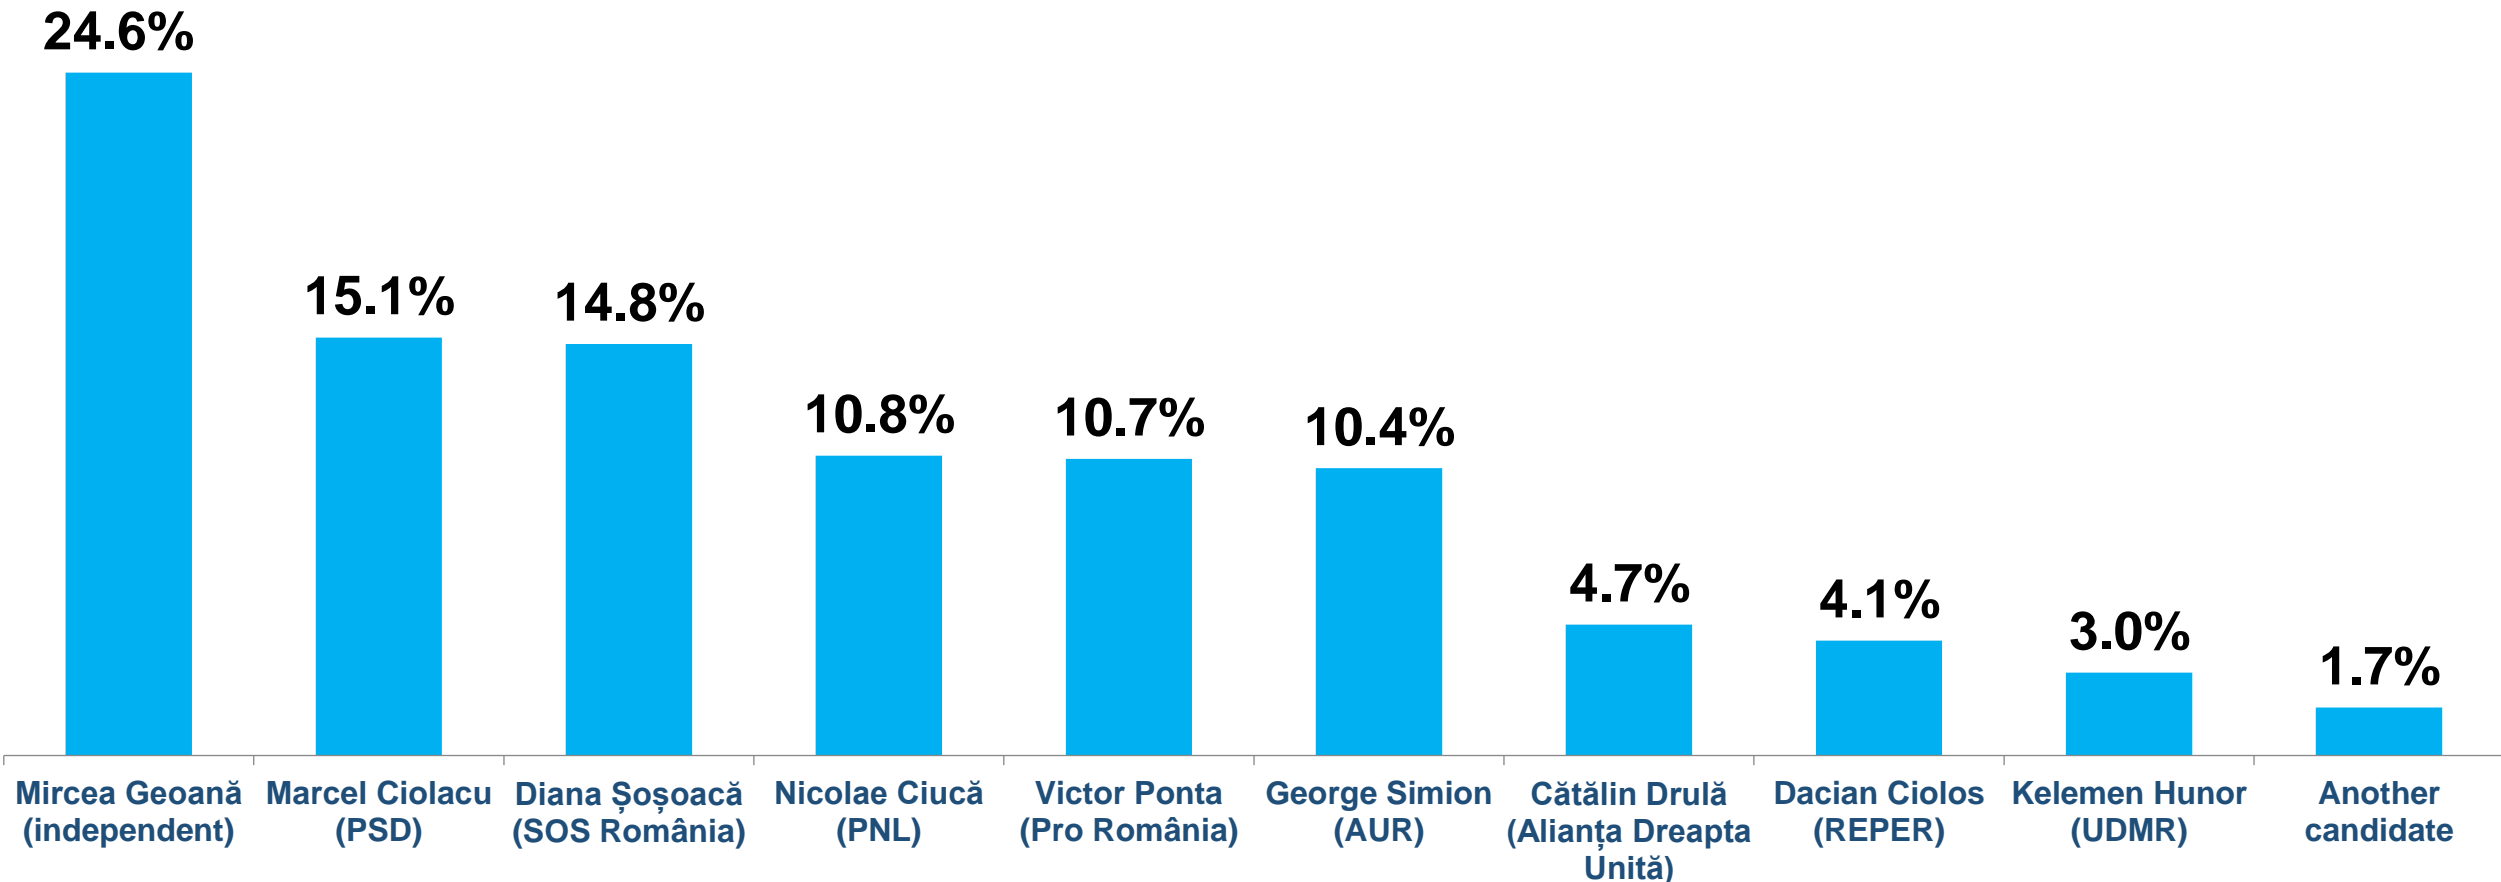

Estimated participation in presidential elections

If presidential elections were held next Sunday, how sure are you that you would go to vote? (*% total sample*)

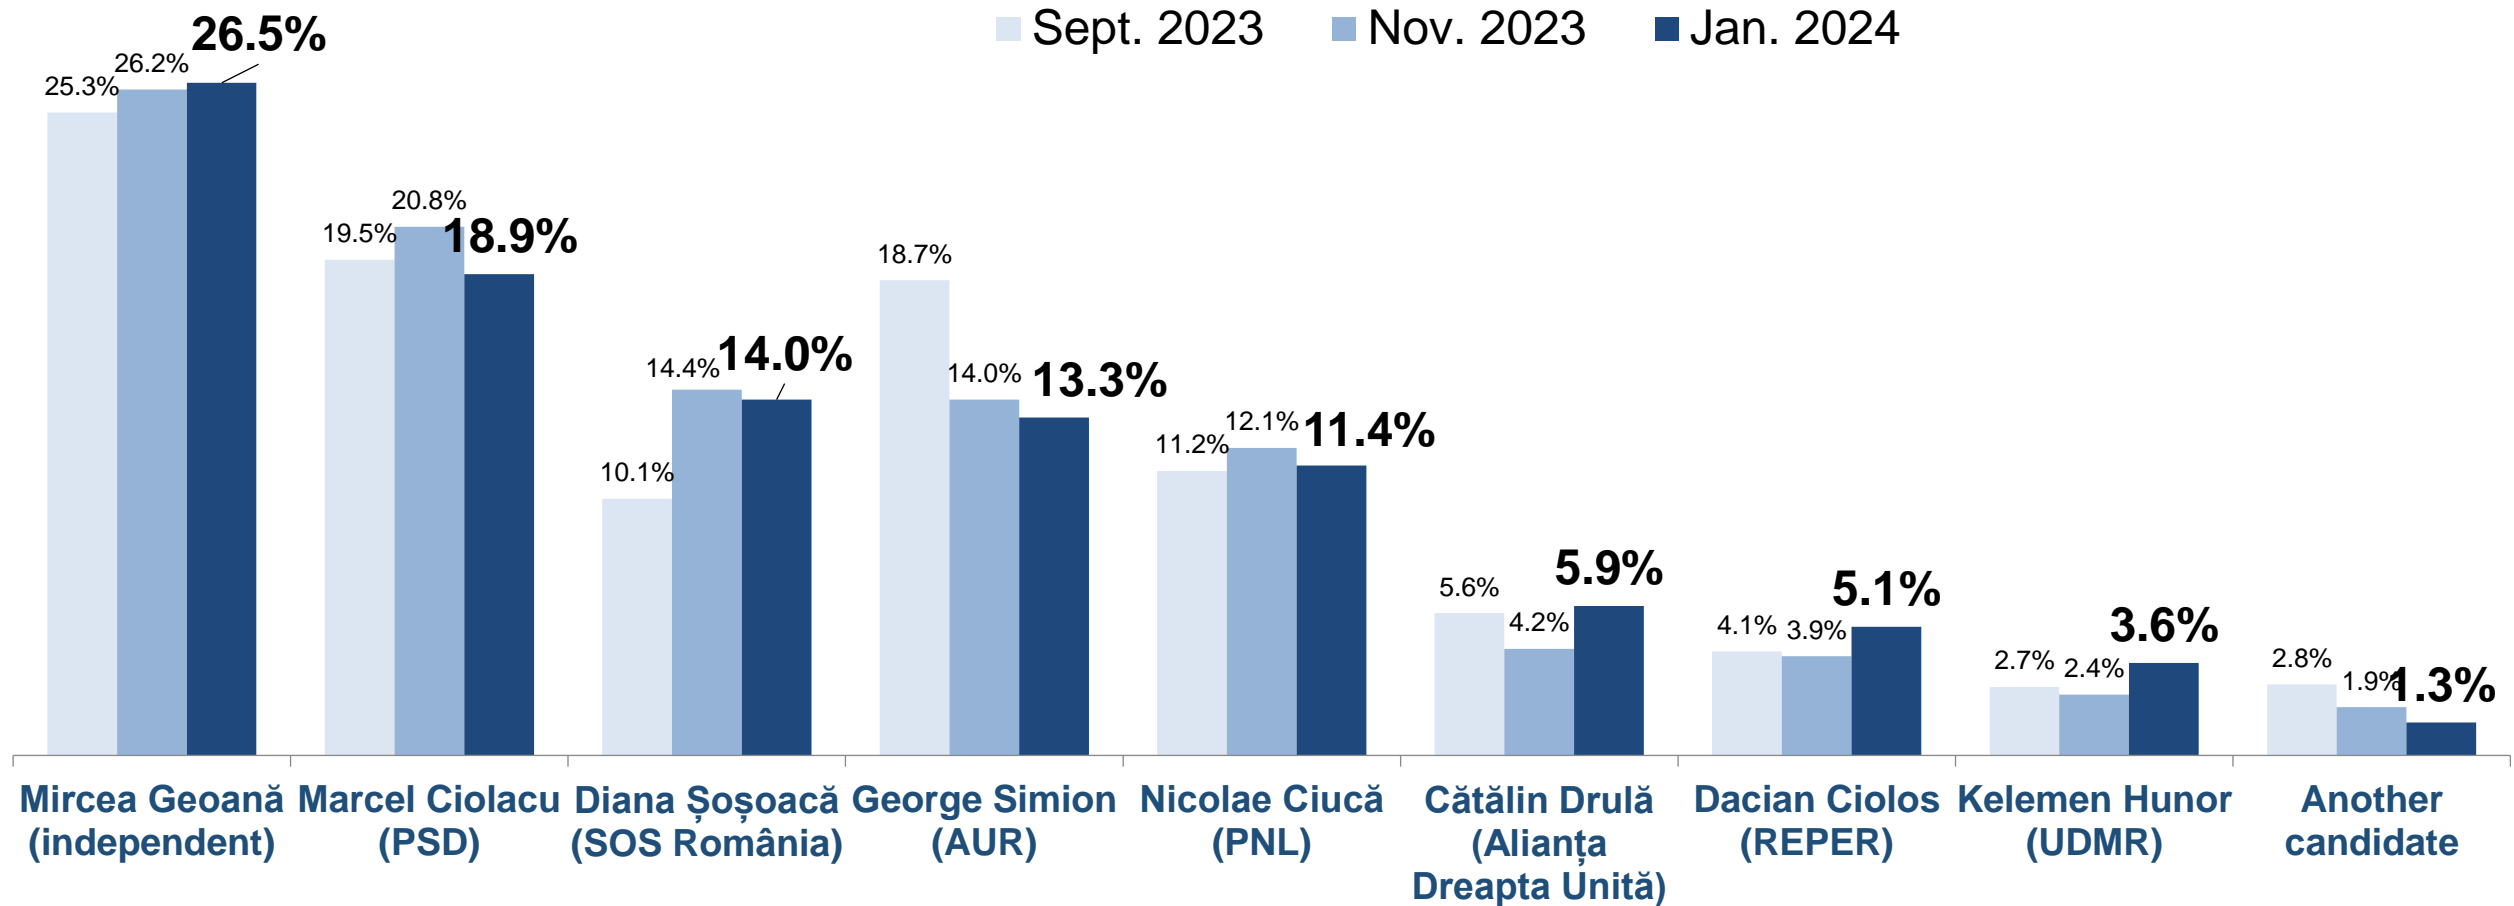

1st Scenario: Voting intentions for presidential elections

If Presidential elections were held next Sunday, who among the following would you personally vote for?
*(% of those who expressed a voting option – **80.2% of total sample**)*

2nd Scenario : Voting intentions for presidential elections

Dacă duminica viitoare ar avea loc alegeri Prezidențiale, dvs personal cu cine ați vota dintre următorii?
(% of those who expressed a voting option – 78.3% of total sample)

Thank you!
