# Research Methodology

BAROMETRUL Informat·ro INSCOP RESEARCH

- **The Informat.ro – INSCOP Research Barometer**, 14th Edition is a monthly public opinion survey conducted by INSCOP Research on behalf of the news platform Informat.ro, in partnership with the Strategic Thinking Group think tank.

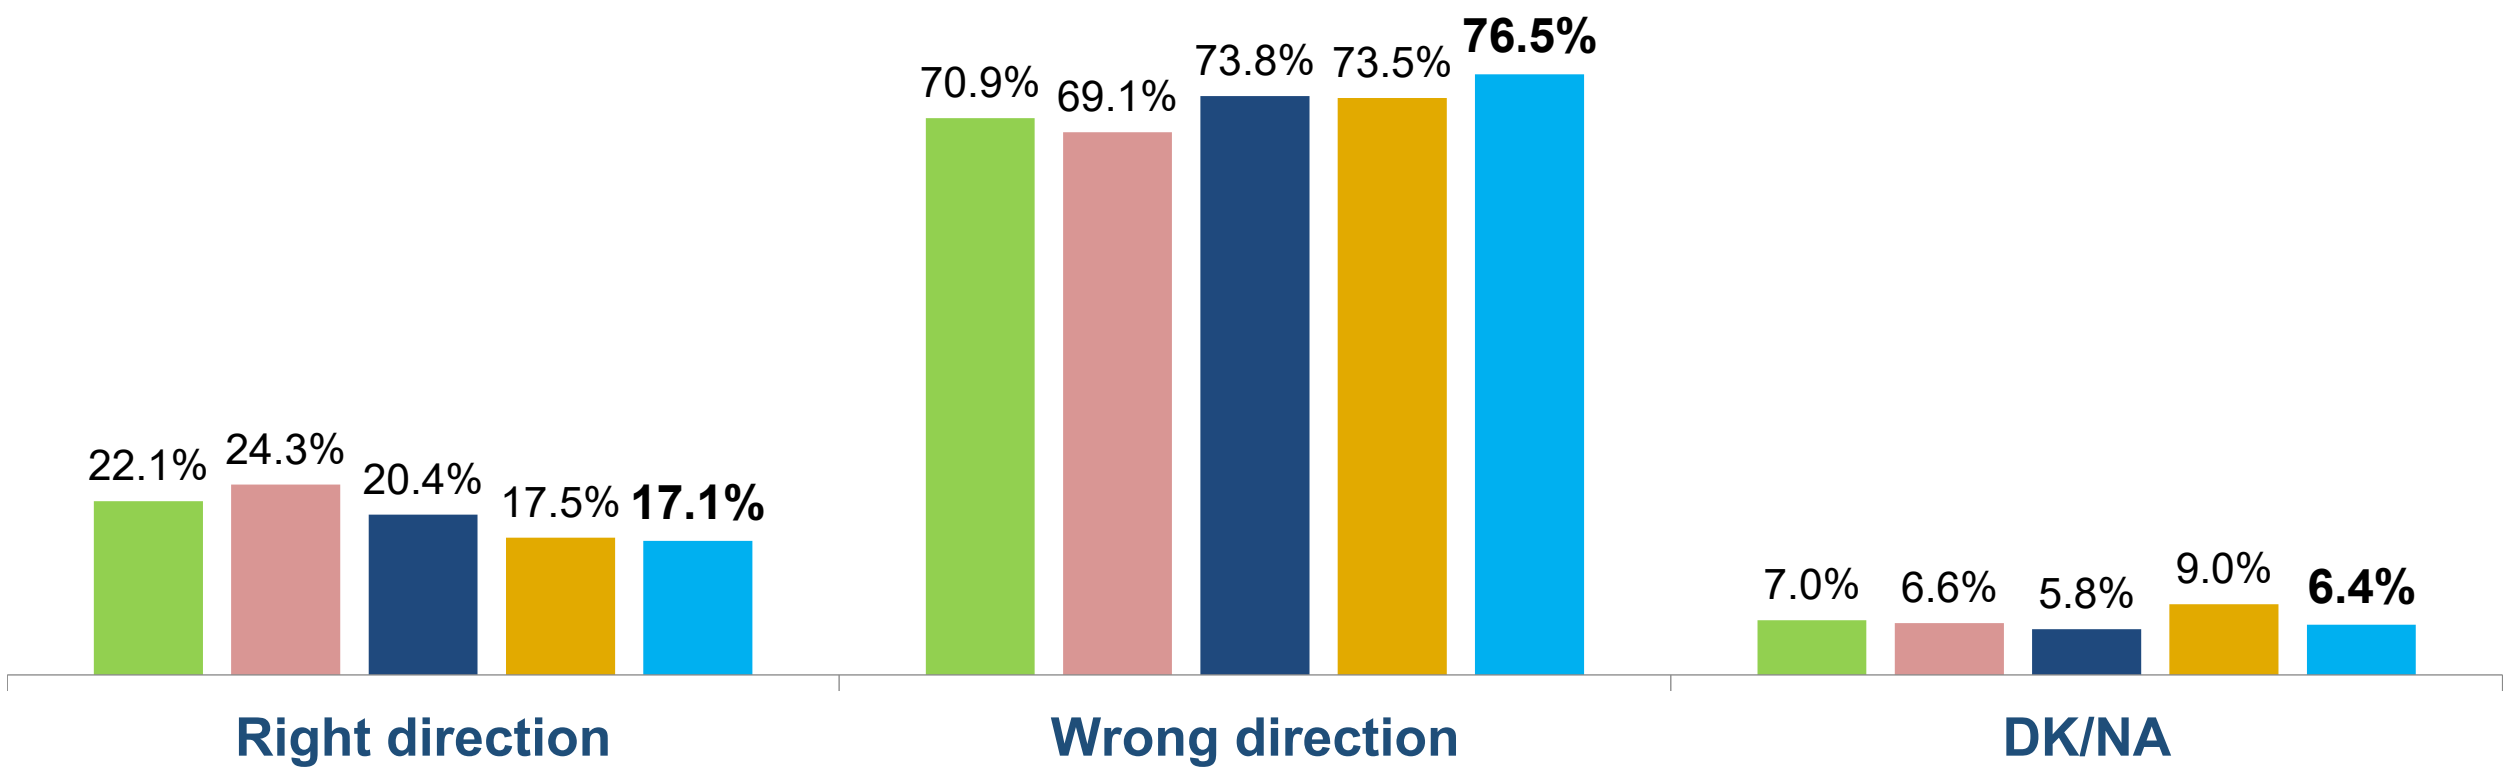
- **The Informat.ro – INSCOP Research Barometer** aims to bring topics of public interest to the forefront and stimulate nationwide conversations on a wide range of issues and public policies that are essential to Romania's present and future, starting from the views and opinions of Romanian citizens and working in partnership with leading think tanks and academic institutions. Through this initiative, we seek to contribute to strengthening democracy by using scientific and credible research tools that place citizens' voices at the center of public debate.

- The data were collected between September 1 and 7, 2026, using the CATI method (Computer-Assisted Telephone Interviewing). The simple random sample consisted of 1,100 respondents and is representative of Romania's non-institutionalized population aged 18 and over across key socio-demographic categories, including gender, age and occupation. The maximum margin of error is ±2.95%, at a 95% confidence level.

# Direction of the Country

In your opinion, are things in Romania heading in the right direction or the wrong direction? *(% total sample)*

BAROMETRUL Informat·ro INSCOP RESEARCH

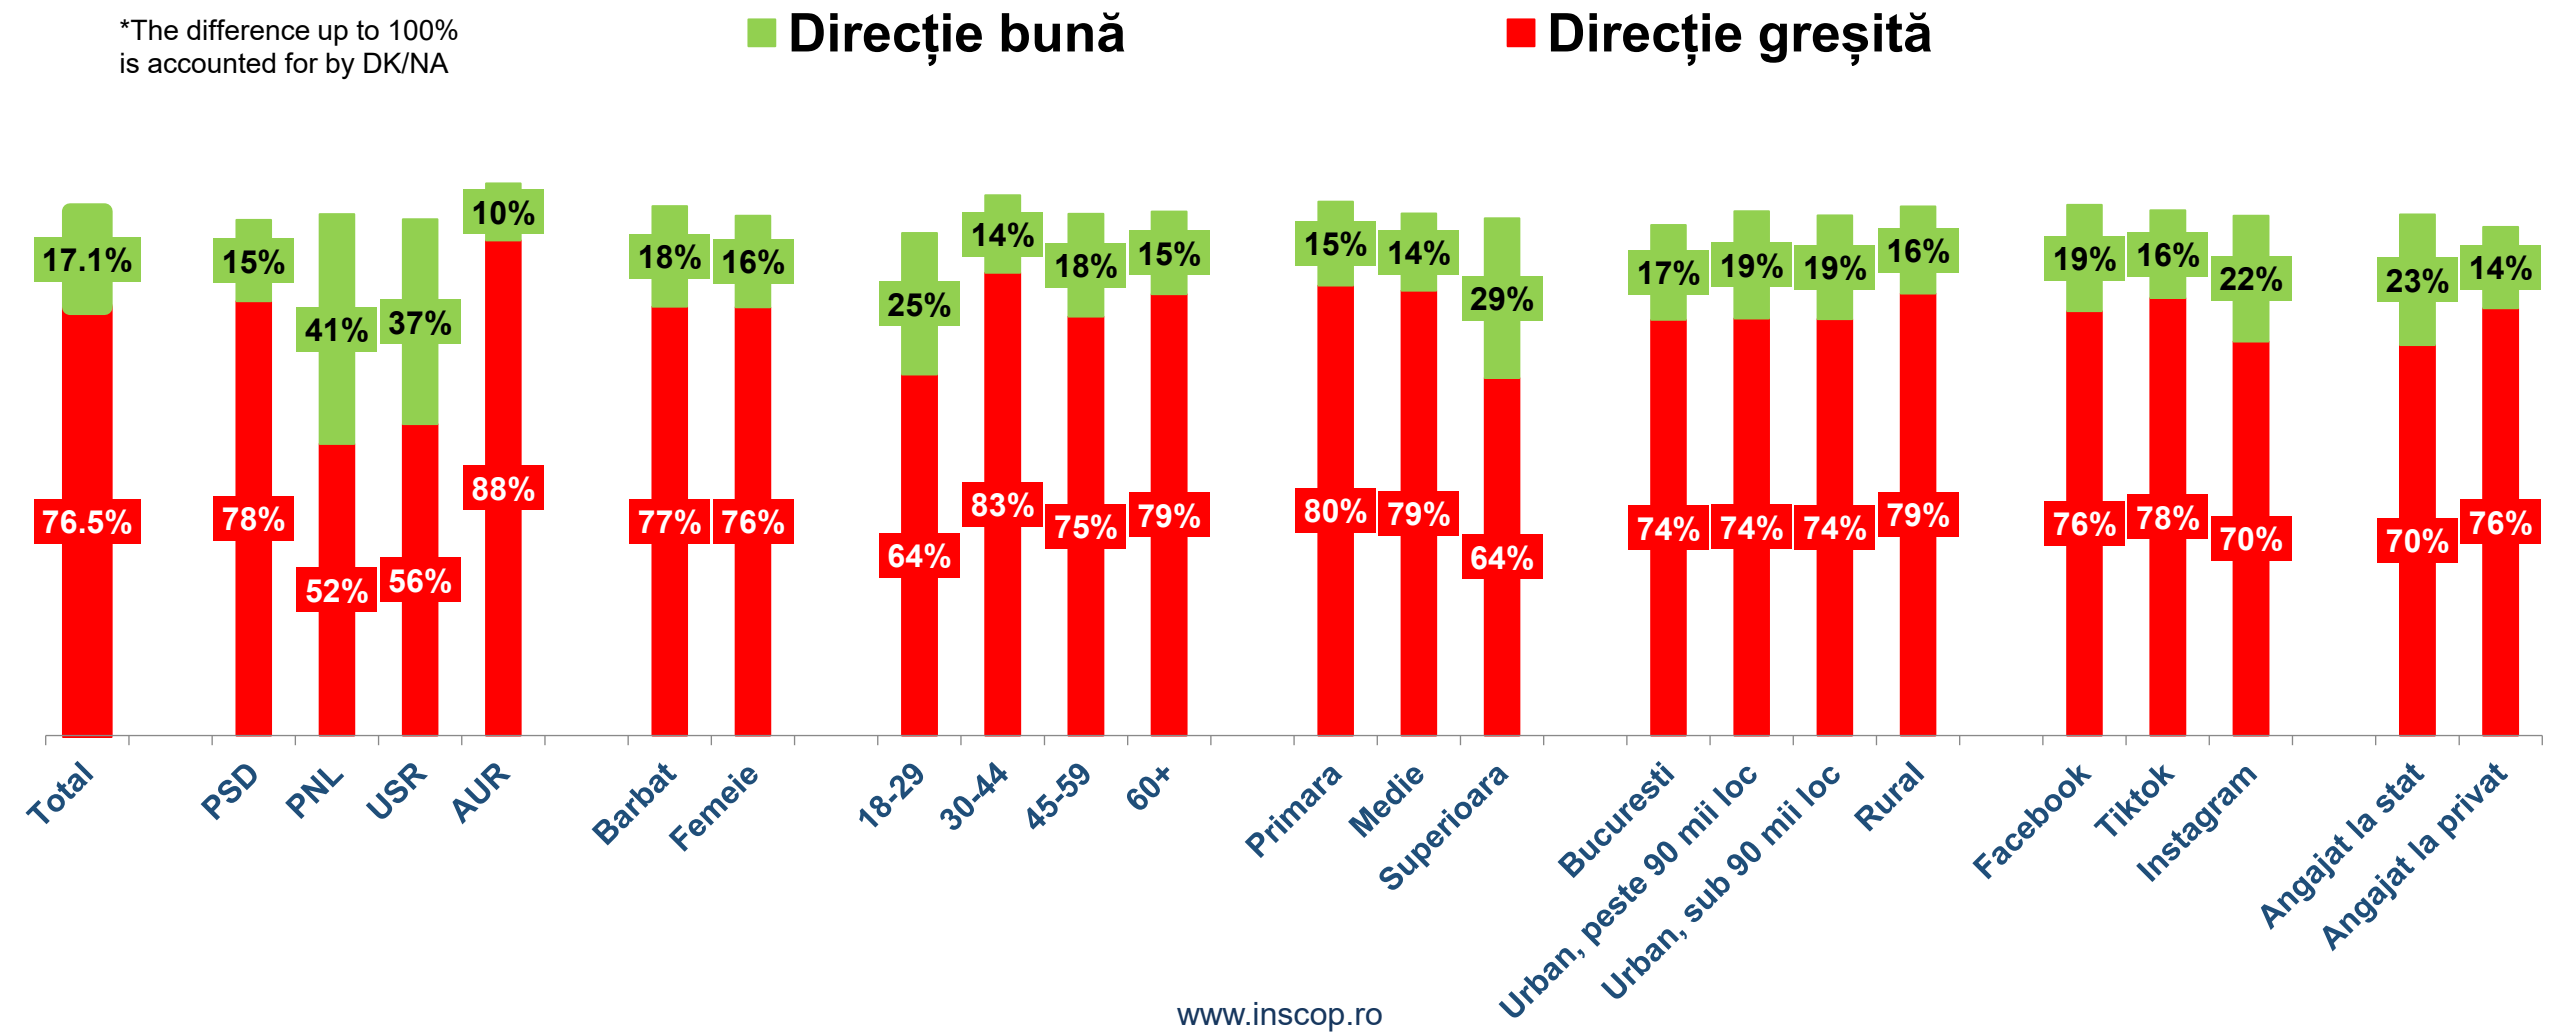


# Profile. Direction of the Country

## Right direction vs. Wrong direction

BAROMETRUL Informat·ro INSCOP RESEARCH

*The difference up to 100% is accounted for by DK/NA



# Thank you!
